

# COLLEGE CREDIT PROGRAM AREAS THE ASSOCIATE IN ARTS DEGREE

# For Transfer to a University

The College offers a two-year program leading to the Associate in Arts degree. Usually referred to as the Transfer or University Parallel Program, it is designed for students who plan to complete their first two years of college work at Florida Junior College at Jacksonville and then transfer as juniors to senior institutions of their choice. The specific programs of study of a given major such as premedical, pre-law, pre-dental, pre-optometry, preagriculture, pre-architectural, pre-engineering, and pre-veterinary should be worked out individually between the student and the counselor soon after the student enrolls at Florida Junior College at Jacksonville. Earned credits may be transferred to senior institutions and applied toward a Bachelor's degree.

In planning a program at Florida Junior College at Jacksonville, the student should be certain to meet the General Education requirements for the Associate in Arts degree and complete a program of at least 62 semester hours comprised of courses designated as either college parallel (P) or dual purpose (D). (Occupational courses do not count toward an Associate in Arts degree.) Also, the Associate in Arts degree cannot include more than four one-semester hour courses in physical education and four one-semester hour courses from music, speech and drama activity courses as described under Conditions (1) and (2) on page 50. Within this 62 semester hours the student should be certain to fulfill the pre-major course requirements for the major which the student intends to take at the university the student plans to attend.

Any student transferring to a senior college from Florida Junior College at Jacksonville is advised to write the registrar of that college for information concerning special course requirements that should be met while attending Florida Junior College at Jacksonville. These requirements vary from university to university; thus, specific programs of study for a given major at a given university should be worked out individually by the student and an advisor or counselor soon after the student enrolls at Florida Junior College at Jacksonville. To maximize transferability, the student is advised to choose a major as early as possible while at Florida Junior College at Jacksonville.

The counselors in the office of Student Development on each campus have counseling manuals provided by each state university in Florida, which list courses to be taken at the junior college for each undergraduate major the university offers. Using

these manuals, as well as catalogs from the universities, the counselor or advisor will work out a program of study at Florida Junior College at Jacksonville for the student. The student has the responsibility for making contact with a counselor or advisor in the office of Student Development to work out the student's program of study at FJC.

# Graduation Requirements

In order to be awarded the Associate in Arts degree, the student must have met the following requirements:

- 1. Earned an all-college cumulative grade point average of 2.00 (C) on courses which comprise the Associate in Arts degree program.
- 2. Earned a Florida Junior College at Jacksonville cumulative grade point average of 2.00 (C) on courses which comprise the Associate in Arts degree program.
- 3. Completed in residence at Florida Junior College at Jacksonville at least 15 semester hours of the total of 62 semester hours required for the degree.
- 4. Completed 62 semester hours of college credit work as follows:
  - a. Complete the general education requirements (36 semester hours) set forth on pages 48 through 50 of this catalog.
  - b. Complete the elective requirements (26) semester hours) set forth on page 50 of this catalog.
- 5. Completed requirements of the Sophomore Testing Program in college-level communication and computation skills as required by State law and rule (refer to Testing Services section for details).

Before a student may graduate, the student must have fulfilled all financial obligations to the College.

Note: Students are cautioned to pay particular attention to conditions on page 50 of this catalog concerning acceptable credits to meet degree require-

A student has the option of meeting the graduation requirements stated in any catalog which was in effect between the term in which the

student initially entered Florida Junior College at Jacksonville as a college credit student and the term in which the student graduates.\*

\*NOTE: See page 35 for determination of the term in which a student graduates.

# General Education Requirements

- 1. The General Education program for the Associate in Arts degree shall consist of a minimum of 36 semester hours of work. This 36 semester hours is part of the minimum of 62 semester hours required for the Associate in Arts degree. General Education, as conceived at Florida Junior College at Jacksonville, is concerned with developing responsible citizenship in a democratic situation. It is formulated to develop skills, attitudes, and understandings in broad areas; the humanities, communications, the social sciences. mathematics, and the natural sciences.
- 2. The following subject areas shall be included in the program in the manner specified:

#### I. SOCIAL SCIENCE . . . . 6 semester hours

- A. Three semester hours from any of the following: (Meets FJC requirement for Study of U.S. Constitution)
  - AMH 2010 UNITED STATES HIS-
  - EUH 1001 WESTERN CIVILIZA-TION
  - POS 2041 AMERICAN FEDERAL GOVERNMENT
  - SSI 1120 ORIGINS OF AMERICAN SOCIETY II
- B. Three semester hours from any of the following:
  - AMH 2020 UNITED STATES HIS-TORY II
  - AMH 2420 HISTORY OF FLORIDA AMH 2571 - AFRO-AMERICAN HIS-TORY AND CULTURE I
  - AMH 2572 AFRO-AMERICAN HIS-TORY AND CULTURE II

B. A minimum of six semester hours from one of the following three pairs of courses is required of all students:

MAT 1033 - INTERMEDIATE AL-GEBRA

MGF 1113 - COLLEGE MATHEMAT-

OR

MAC 1104 - COLLEGE ALGEBRA MGF 1113 - COLLEGE MATHEMAT-ICS

OR

MAC 1104 - COLLEGE ALGEBRA STA 1014 - ELEMENTARY STATIS-TICS

### IV. COMMUNICATIONS ... 9 semester hours

A. Both of the following three semester hour courses are required of all students:

ENC 1101 - ENGLISH COMPOSI-TION I

SPC 1010 - FUNDAMENTALS OF SPEECH COMMUNICATION

B. The following three semester hour course is required of all students:

ENC 1102 - ENGLISH COMPOSI-TION II

<sup>\*</sup>May be used to satisfy area I. B. or II. B., but not both.

<sup>\*\*</sup>May be used to satisfy area I. B. or III. A., but not both.

V. Additional hours, if needed, to fulfill the 36 hour General Education Requirement. These may include excess hours from the above four areas and/or up to three one-hour physical education activity courses (DAA, LEI, PEL, PEM, PEN).

VI. ELECTIVES ........26 semester hours

#### TOTAL: 62 SEMESTER HOURS

The 26 semester hours of elective credit required in Area VI may be selected from among the courses listed in the catalog with the following designations, subject to conditions listed below:

- (P) University Parallel . . . This course is intended to transfer to a university.
- (D) Dual Purpose . . . Any course identified by this symbol is a university parallel course. The course is also part of certain occupational programs; hence, it serves both university parallel and occupational objectives.

#### Conditions:

- Not more than four of the 26 semester hours may consist of one-semester hour physical education activity courses less any used in Area V.
- (2) Not more than four of the 26 semester hours may consist of music, speech, and drama activity courses. These courses are: MUO 1001, MUN 1130, MUN 1280, MUN 1380, MUN 1410, MUN 1710, MUNA 1310, MUNB 1310, SPC 2594, THE 2925.
- (3) A maximum of three credit hours earned in MAT 1002, MAT 1003, MAT 1003L, and MAT 1024 may be applied to the associate degree as elective credits.
- (4) A maximm of three credit hours earned in ENC 1001, ENC 1002, REA 1005, REA 1006, REA 1007, REA 1305, and REA 1315 may be applied to the associate degree as elective credits.
- (5) Not more than 48 semester hours of credit earned in courses offered via television may be applied towards the Associate in Arts degree.

Many courses in this catalog have prerequisite courses listed in the course descriptions. Students are advised to be guided by these requirements.

# THE ASSOCIATE IN SCIENCE DEGREE

# For General Education or To a Job and Career in Two Years

Florida Junior College at Jacksonville offers a comprehensive series of business, health, engineering and industrial related, home economics, distributive, public service, and other programs designed to fulfill the occupational needs of the community's citizens and employers.

The Occupational Education Programs are designed to prepare the student who, at the completion of a program of study listed in this section of the catalog, is planning to enter a chosen career at the semi-professional level, or who plans to transfer to a senior institution offering the baccalaureate degree in a related technology area, based on the articulation agreement with the senior institutions.

Advisory committees help Florida Junior College at Jacksonville create programs and courses to prepare today's youth and adults for the world of work. The advisory committees are made up of civic-minded representatives of business, industry, government, health agencies, public service, and labor.

Individuals who seek to pursue a career at the technician or at the para-professional level may enroll in a two-year college credit program leading to the Associate in Science degree. For those persons desiring to spend less than two years in preparation, College Credit Certificate programs are available in several areas.

The program director may prescribe deficiency courses which are necessary for successful comple tion of the Associate in Science degree. If the student is a veteran, a copy of the director's recommendation must be on file and the course or courses certified as deficiency to the Veterans Administration.

The program director may approve another elective or professional course not listed as an approved elective in the Associate in Science degree curriculum which will apply toward Associate in Science degree graduation. If the student is a veteran, it is necessary that such course substitution be obtained from the State approving agency prior to the student's enrollment in the course being substituted. A record of the approval will be maintained in the veteran's file.

# Graduation Requirements

In order to be awarded the Associate in Science degree, the student must have met the following requirements:

- 1. Earned a cumulative grade point average of 2.00 (C) on all college credit courses, including transfer credits.
- 2. Earned a grade point average of 2.00 (C) on all courses taken at Florida Junior College at Jacksonville.
- 3. Completed in residence at Florida Junior College at Jacksonville at least 15 semester hours of the required program.
- 4. Completed the general education requirements and required courses as set forth in the college catalog or as approved by the director of the program. The health education programs of study may require a "C" grade or better in professional courses. A minimum of 60 semester hours is required for this degree, of which at least 15 semester hours must be in general education.

Before a student may graduate, the student must have fulfilled all financial obligations to the College.

# General Education Requirements

- A minimum of fifteen semester hours of General Education is required for all Associate in Science degree programs of study.
- 2. The following subject areas shall be included in each program in the manner specified hereafter:

### I. SOCIAL SCIENCE .... 3 Semester Hours

Any one of the following 3 semester hour courses to meet FJC requirement for study of the U.S. Constitution:

AMH 2010 - UNITED STATES HISTORY EUH 1001 – WESTERN CIVILIZATION POS 2041-AMERICAN FEDERAL GOV-ERNMENT

SSI 1120-ORIGINS OF AMERICAN SOCI-ETY II

### II. HUMANITIES . . . . . 3 Semester Hours

Any course(s) listed under Area II (Humanities) for Associate in Arts degree.

### III. MATHEMATICS - NATURAL SCIENCE ..... 3 Semester Hours

Any course listed under Area III (A) Natural Science for the Associate in Arts degree or any course listed below - OR as specified in individual Associate in Science degree programs:

CNM 1001 - Computer Oriented Mathemat-

MAC 1104 - College Algebra

MAC 1114 - College Trigonometry

MAC 1311 - Calculus with Analytic Geom-

MAC 2312 - Calculus with Analytic Geom-

MAC 2313 - Calculus with Analytic etry III

MAP 2302 - Differential Equations

MAT 1033 - Intermediate Algebra

MGF 1113 - College Mathematics

STA 1014 – Elementary Statistics

### IV. COMMUNICATIONS .. 3 Semester Hours

The following three semester hour course is required of all Associate in Science degree students:

ENC 1101 - ENGLISH COMPOSITION I

V. THE REMAINING GENERAL EDUCA-TION REQUIREMENT may be selected from courses listed in any one of the four categories under requirements for Associate in Arts degree or as specified in individual Associate in Science degree programs.

A minimum of 60 semester hours is required for the Associate in Science degree. Some programs require more. Lists of additional courses required are set forth in individual Associate in Science degree programs. The total credit hours listed for each individual program are minimum hours required for program completion.

Not more than 24 semester hours of credit earned in courses offered via television may be applied towards the Associate in Science degree.

# Associate in Applied Science Degree

# To Prepare For an Occupation in Two Years

The objective of the Associate in Applied Science degree is to provide a more comprehensive and higher level of training than can be offered by the non-college credit occupational preparatory programs of study.

Associate in Applied Science degree general education requirements and graduation requirements are the same as those for the Associate in Science degree.

# College Credit Certificate

### To a Job in One Year

Florida Junior College at Jacksonville provides a number of educational programs of less than two years duration for which technical certificates are awarded upon satisfactory completion.

# Graduation Requirements

In order to be awarded a College Credit Technical Certificate, the student must have met the following requirements:

- 1. Earned a grade point average of 2.00 (C) on all courses taken at Florida Junior College at Jacksonville.
- 2. Completed the required courses as set forth in the College catalog or as approved by the director of the program.
- 3. Completed at least one-fourth of the total hours required for a certificate in residence at Florida Junior College at Jacksonville.

Before a student may graduate, the student must have fulfilled all financial obligations to the Col-

# Associate in Science Degree, Technical Certificate, and University of North Florida Transfer Programs

### BUSINESS EDUCATION

### Accounting

The Accounting Program is primarily designed for those students who intend to seek immediate employment in some area of accounting. The program is also intended for, and most beneficial to, those individuals who are presently using accounting and/or accounting information in their employment. The aim of the Accounting Program is to prepare students for positions in industry; federal, state, and local government; and public accounting. The professional certified public accountant candidate should follow the Associate in Arts degree for the Business Administration program of studies.

This program is based upon the development of a thorough knowledge of accounting principles and theory, and then seeks to develop the student's ability to apply this knowledge to problem situations. An intensive study of accounting and related business subjects is combined with general education courses to provide a well-balanced program.

### **Data Processing**

There are three programs in Data Processing at Florida Junior College at Jacksonville. These programs are: (a) Associate in Science with an emphasis in Data Processing, (b) Certificate in Computer Operations, and (c) Certificate in Computer Programming.

The Associate in Science degree is a two-year course of study to prepare students for a variety of positions in data processing. The following are some of the job titles: (a) program coders, (b) control analysts, (c) junior programmers, and (d) programmer-analyst trainees.

Graduates with the AS degree may be able to continue studies in Information Systems Technology in

a senior institution. Those who wish to major in Computer Science are advised to elect the AA degree which should include the Calculus sequence as part of the program requirements.

The Certificate in Computer Operations is a one-year program which includes experience with the operation of data processing equipment in the College's Data Center and the Data Processing instructional laboratory. Field trips enable students to be exposed to a greater variety of equipment, operating systems, and computer applications.

A limited number of laboratory assistantships is available for students to gain valuable experience with the operation of the IBM Computer System and the Prime 300 minicomputer system.

The Certificate in Computer Programming is an abbreviated program recommended for those students with previous college-level course work and/or business experience. It is a one-year course of study for those who wish to be gainfully employed as junior programmers or programmer-analyst trainees.

Students interested in a computer programming career are urged to take the programmer's aptitude test available through the Student Development Office on the North Campus.

Full-time students wishing to complete any of the above programs must be enrolled in two Data Processing courses as part of their course load during the Fall and Winter Terms (I and II). However, these courses are not to be taken in the order as listed hereafter.

The program director may require additional courses or make substitutions required to meet the needs of students.

#### **General Business**

The two-year General Business Program is designed to prepare students for advancement in a business profession. The emphasis of the course selections is on business courses as only five General Education Courses are required. It is important to note that this program is not intended to be a substitute for the four-year Business Administration Program. The director of the program may require and/or approve additional courses for program completion or may approve substitution of courses based on student needs.

### Secretarial Science

The two-year Secretarial Science Program is designed to fill the needs of the student who is preparing for a top level secretarial position. The program is a combination of general education, business education, and special education to develop the skills necessary for a secretarial position. Classroom experiences aid

he student in successfully coping with the different phases of secretarial work: dictation and transcription; office practice, procedures, and management; and problems in typewriting at the vocational competency

The student may elect to learn either machine shorthand or Gregg shorthand in order to satisfy the requirements of the program. The student selecting machine shorthand must complete the course sequence SES 1221, SES 2222, and SES 2223. The student selecting Gregg shorthand must complete the course sequence SES 1211, SES 2212, and SES 2213: Individual courses in one course sequence are not interchangeable with courses in the other course sequence. Machine shorthand is offered only on the South Campus.

The director of the program may require and/or approve additional courses for program completion or may approve the substitution of courses based on student needs.

<sup>\*</sup>Refer to AS degree General Education Requirements.

<sup>\*</sup> Students will be placed at proper level in typewriting and shorthand. Students without skills required for completion of SES 1210 Beginning Shorthand, if Gregg Shorthand method is selected, and SES 1100 Beginning Typewriting I will be required to take these courses, which may increase the hours required for graduation. The Secretarial Science two-year degree program requires nine hours in typewriting and nine hours in shorthand.

<sup>+</sup>ACC 2001 may be taken in place of ACC 1009 and 1029.

### Clerical

This clerical certificate program prepares students for entry into the clerical job market. It combines training in communications, numerical skills, typewriting and office procedures to ensure the student's employability upon completion of the program.

The program director may require and/or approve additional courses for program completion or may approve course substitutions based on student needs.

# Stenography

This technical certificate program is designed for the student who is preparing to enter the job market with typing and stenographic skills. It combines training in typing, office procedures, business communications, and shorthand.

The program director may require and/or approve additional courses for program completion or may approve the substitution of courses based on student needs.

### DISTRIBUTIVE EDUCATION

# Banking

This two-year program is structured to provide students with both the general and specialized skills and competencies needed to embark upon a profitable and rewarding banking career. Jacksonville is a hub of financial activity, and financial institutions such as banks are looking for qualified and motivated degree students to enter their executive training programs. Opportunities in banking are especially good because of the variety of departments such as business development, public relations, installment credit, international trade development, commercial services, loans and securities.

The program is designed to serve both the younger student who recently completed high school and experienced bank employees. Besides providing college credit, completed banking courses count toward American Institute of Banking certificate programs.

An option transfer program is available to students for admittance to the University of North Florida. Students electing this option are accepted as third year students at UNF. Students electing the transfer program to the University of North Florida must complete the transfer program requirements.

Those desiring credit union education should select two specialized credit union courses, replacing bankoriented courses.

The program director may require additional courses or make substitutions required to meet the needs of students.

## **Hospitality Management**

This program is designed to provide career-oriented students with the basic principles and job entry working skills and the training for supervisory and management positions in the hotel, motel, apartment, lodging and food service industry. The program is designed to provide the student with a foundation for building a rewarding position and satisfying career in a dynamic, growing industry. The hotel, motel, apartment, tourism, and food service industry is the largest and fastest growing business in Florida. AS degree students with an educational background of this business are in demand. Training includes communication and managerial skills, human relations, and leadership. Through the internship program of Hospitality Management, students gain college credit and valuable, profitable work experience. Job placement is available through the college Hospitality Management Advisory Committee.

| *Refer to AS degree General Education Requirements **Choices in these courses are determined by the student's employment outlook. This decision will determine what type of institution the student will be placed in for the internship courses of HFT 2941 and 2942. Internship will consist of 15 hours per week of on-the-job training. Students are encouraged to seek part-time employment in the hospitality industry while attending college and during the summer. | Relations   3  |

The program director may require additional courses or make substitutions required to meet the needs of students.

#### Insurance

This program's objective is to provide students with the necessary course work that can lead to profitable and rewarding careers in the insurance industry — life, property and casualty, and health. Emphasis is placed on job preparation for affiliation with insurance agencies and home office operations. Jacksonville, being the "Insurance Capital of the South," offers great opportunity to qualified insurance AS graduates.

Courses are made available to those persons already employed for career advancement opportunities. These include Chartered Life Underwriters (CLU), Life Office Management (LOMA) and Insurance Institute of America (IIA). Courses leading to licensing requirements for property and casualty general agents, solicitors, and adjusters are also available.

An option transfer program is available to students for admittance to the University of North Florida. Students electing this option are accepted as third year students at UNF. Students electing the Transfer Program to the University of North Florida must complete the Transfer Program requirements.

The program director may require additional courses or make substitutions required to meet the needs of students.

#### Real Estate

This program is designed to provide students with a meaningful background in real estate as particularly related to principles, practices, and license law. Pre-licensing requirements established by the Florida Real Estate Commission for licensed salespersons are incorporated into the program. Through a variety of course offerings, students are presented an opportunity to specialize in other areas of real estate including management.

An option transfer program is available to students for admittance to the University of North Florida. Students electing this option are accepted as third year students at UNF. Students electing the Transfer Program to the University of North Florida must complete the program requirements.

The program director may require additional courses or make substitutions required to meet the needs of students.

### Sales-Marketing-Retailing

The Sales-Marketing-Retailing program provides the student with a background that will assist in preparing for a career in the areas of sales, sales management, sales promotion, advertising, wholesaling, retailing, and market research. Career opportunities in these fields exist in private industry, government, and the professions.

The curriculum includes the study of activities necessary to place goods and services in the hands of household consumers and industrial users. The classroom experiences provide a broad understanding of the marketing process, as well as specialized knowledge in the various areas of marketing.

The director of the program may require and/or approve additional courses for program completion or may approve the substitution of courses based on student needs.

### **Transportation**

The purpose of the Transportation program is to enable students to obtain a meaningful career, either in industrial traffic management or in the commercial carrier industry.

The Transportation Advisory Committee continually keeps the faculty aware of industrial needs, job opportunities, changes in transportation technology, and placement services.

Transportation curricula are continually updated, and new courses developed to meet community requirements. The courses provide students with ample specialized training and skills to enter the highly technical field of transportation and distribution.

An option transfer program is available to students for admittance to the University of North Florida. Students electing this option are accepted as third year students at UNF. Students electing the Transfer Program to the University of North Florida must complete the Transfer Program requirements.

The program director may require additional courses or make substitutions required to meet the needs of students.

### ENGINEERING AND INDUSTRIAL RELATED EDUCATION

### Air Traffic Management

The Air Traffic Management Program provides the student with a background that will assist in posterior ing for a career in air traffic control and air traffic facility operation. Career opportunities in the fields exist in private industry and government.

The curriculum includes the study of activities necessary to control aircraft in the air and on the ground safely and economically.

Upon completion of this program, the student would be able to step right into FAA vacancies precluding extensive additional training.

# Architectural and Building Construction Technology

The objective of this program is to prepare the student for a career as a drafter or as an assistant to architects, engineers, or employers whose companies are associated through services or products with the architectural and building construction field.

A student will be considered as selected for this program when the student has an Associate in Science degree advising sheet signed by the program director. Students with an inadequate mathematics background will be required to enroll in MAT 1024, Elementary Algebra, and MAT 1033, Intermediate Algebra.

The objective of the certificate program is to prepare students for occupations related to the building construction industry. In particular the graduate of this program could be employed by a surveying company either as a field party member or as an office drafter transferring the field notes into survey plats. Other job opportunities would consist of working as a technician for an engineering testing company, making those in-place tests or laboratory tests required of the contractor. Still other possibilities are to assist the architect as the job inspector, or to assist the job superintendent on the job site, or to draw up preliminary sketches, for the contractor, architect or engineer. In summary, this certificate program provides a starting point for the graduate to enter building construction or related businesses.

Graduates of the one-year certificate program in Architectural and Building Construction Technology may elect to continue for the Associate in Science degree in Architectural and Building Construction Technology.

# Civil Engineering Technology

The objective of this program is to prepare the student for a career in fields related to Civil Engineering such as drafting, construction, surveying, road building, hydraulics, or instrumentation.

A student will be considered as selected for this program when the student has an Associate in Science degree advising sheet signed by the program director. Students with an inadequate mathematics background will be required to enroll in MAT 1024, Elementary Algebra, and MAT 1033, Intermediate Algebra.

The objective of the one-year certificate program in Civil Engineering Technology is to prepare the student for a career in the fields related to civil engineering such as drafting, construction, surveying and road building. A graduate of this program could be employed to assist the architect as the job inspector, or to draw up preliminary sketches for the contractor or engineer. In summary, this certificate program provides a starting point for the graduate to enter the building construction business or related businesses.

Graduates of the Civil Engineering Technology certificate program may elect to continue studies for the Associate in Science degree in Civil Engineering Technology.

NOTE: Students are advised to refer to individual course descriptions for prerequisites.

The program director may specify some curriculum modification. No changes or course substitutions will be made without the approval of the program director.

## **Drafting and Design Technology**

The objective of this program is to prepare students for careers as assistants to engineers or architects. The graduate will be prepared to translate ideas, sketches, calculations, and specifications into complete and accurate working drawings.

A student will be considered as selected for this program when the student has an Associate in Science degree advising sheet signed by the program director. Students with an inadequate mathematics background will be required to enroll in MAT 1024, Elementary Algebra, and MAT 1033, Intermediate Algebra.

The program director may specify some curriculum modifications. No changes or course substitutions will be made without the approval of the program director.

A certificate program is also offered in Drafting and is designed to prepare the student for employment

The graduate of the certificate program may elect to continue studies for the Associate in Science degree in Drafting and Design Technology.

# Electronic Engineering Technology

The objective of this program is to prepare the student for a career associated with the electronics industry as a technician or assistant to engineers and scientific personnel in electronic systems and processes.

A student will be considered as selected for this program when the student has an Associate in Science degree advising sheet signed by the program director. Students with an inadequate mathematics background will be required to enroll in MAT 1024, Elementary Algebra, and MAT 1033, Intermediate Algebra.

The student completing the one-year program in electronics may expect to find employment at the entry or beginning technician level in those local industries which normally employ highly skilled people to service and maintain the complex electronics equipment and systems used in modern industry. These industries may use automated process and production equipment, complex business and data processing systems, computer data terminals and other communications systems. In addition, the beginning technician may be employed as an assistant to engineers and engineering technicians in the design and implementation of automated production equipment, the production of technical manuals, blueprints and drawings, and electronics photocopy.

Graduates of the one-year certificate program in electronics may elect to continue studies for the Associate in Science degree in Electronic Engineering Technology.

# **Mechanical Engineering Technology**

The objective of this program is to prepare the student for a career as an engineering aide or technical assistant in numerous specialty areas associated with mechanical engineering or technology.

A student will be considered as selected for this program when the student has an Associate in Science degree advising sheet signed by the program director. Students with an inadequate mathematics background will be required to enroll in MAT 1024, Elementary Algebra, and MAT 1033, Intermediate Algebra.

The mechanical engineering one-year certificate program is designed to prepare students to work as "engineering aides" in various mechanical engineering areas. The aide may work under the supervision of a mechanical engineer or a trained technician. The aide may complete drawings from sketches, prepare working drawings, work in production control, safety department, or in the maintenance department of a manufacturing or industrial organization.

Students completing the certificate program may elect to continue studies for the Associate in Science degree in Mechanical Engineering Technology.

### Printing/Graphic Arts

The two-year program in Printing/Graphic Arts is designed to provide the student with a working knowledge of each of six major areas of the printing industry, and then to develop in the student occupational skills in the one area or process in which the student demonstrates aptitude and interest.

Lecture courses and hands-on laboratory experience will be provided for training in Hand and Machine Composition and Form Make-up; Letterpress Press Operation and Form Lockup; Cold Typesetting and Pasteup; Camera Operation and Film Processing; Negative Stripping and Offset Platemaking; and Offset Press Operation and Related Bindery Functions.

The program director may require additional courses or make substitutions required to meet the needs of students.

# X-Ray Engineering Technology

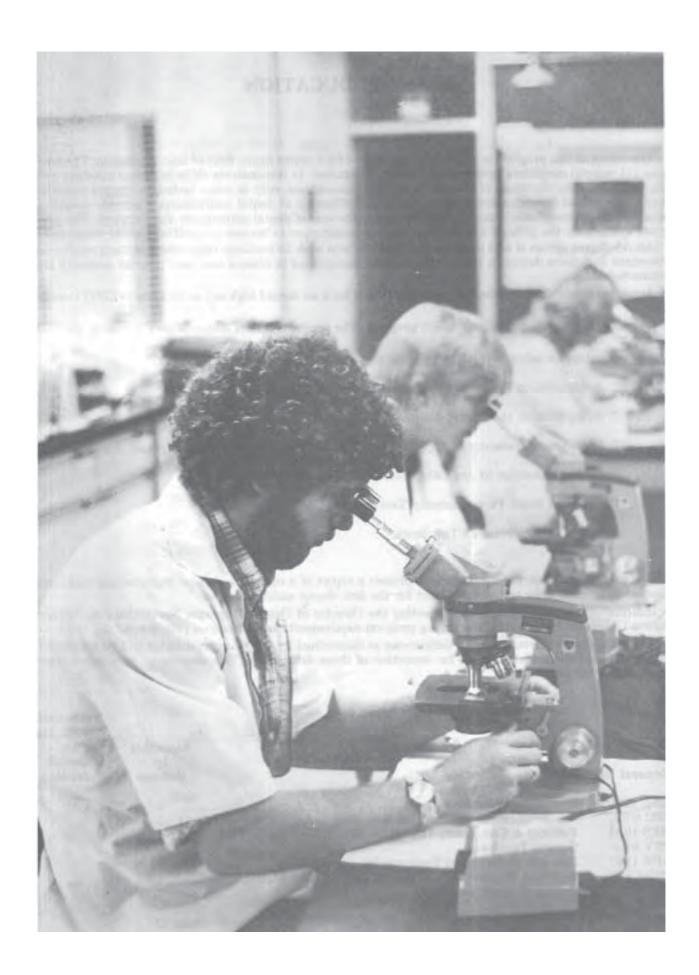

The objective of this program is to prepare a student for a career in the medical or industrial field as a technologist specializing in the use, installation, calibration, and maintenance of radiologic equipment.

A student will be considered as selected for this program when the student has an Associate in Science degree advising sheet signed by the program director. Students with an inadequate mathematics background will be required to enroll in MAT 1024 Elementary Algebra, and MAT 1033 Intermediate Algebra.

|   |                 |               | Total credit hours            | 68      |

NOTE: Students are advised to refer to individual course descriptions for prerequisites.

The program director may specify some curriculum modifications. No changes or course substitutions will be made without the approval of the program director.

## HEALTH EDUCATION

### Dental Assisting

The object of this program is to prepare the student for a career in the field of dental assisting. The oneyear (11 month) certificate program will enable the student to demonstrate skills in dental assisting and the expanded duty functions of the dental auxiliary procedures, such as x-ray technique, dental material manipulation and identification, and the use and sterilization of dental instruments. Chairside assisting, application and use of medicaments, and assisting in the care of dental patients are also included. This program will qualify the grduate to take the national examination to become a Certified Dental Assistant.

An AS degree option is also available for students who wish to continue their education and receive an Associate in Science degree in Dental Assisting, A background in science and good manual dexterity are recommended.

Applicants must show evidence of good health and have an earned high school diploma or GED Certifi-

Dental Assisting is a limited-admission program. The program admits students once a year in the Fall Term.

An application for admission to the program must include the following:

- 1. Application to Florida Junior College at Jacksonville.
- 2. Application to the Dental Assisting Program.
- 3. High School transcript or copy of General Education Development (GEI) test.
- 4. College transcript (if any college work has been attempted).
- 5. Crawford Small Parts Dexterity Test Score.
- California Achievement Test Score.

Students admitted to the program must present a report of a complete physical examination made not more than 30 days prior to the enrollment for the first dental assisting course.

Information may be obtained by contacting the Director of Dental Programs, North Campus, Florida Junior College at Jacksonville, concerning program requirements and admission procedures.

Any students who have academic deficiencies as determined by the program director will be scheduled into additional appropriate courses for correction of those deficiencies. This assessment may occur prior to or during the program.

### Dental Hygiene

The program in Dental Hygiene offers the student an opportunity to learn the technical and clinical skills of dental hygiene. The curriculum includes academic, technical, and clinical courses. Upon completion of the program, the student is prepared to take the dental hygiene licensure examinations. Upon successful completion of these examinations, the graduate will be licensed to practice in the field in dental hygiene.

One class is admitted annually to this two-year AS degree program. Due to facility requirements and accreditation standards, admission to the program is limited. Applicants must show evidence of good health and have an earned high school diploma or GED Certificate. College preparatory biology and chemistry are requirements for admission to the Dental Hygiene Program. A background of science and mathematics and good manual dexterity are strongly recommended. Continuation in the program's second year is dependent upon maintaining a 2.00 average in the first year. A grade of C or above must be maintained in all Dental Hygiene courses. Present program of studies is subject to change. Dental Hygiene is a limited admissions program.

An application for admission to the program must include the following:

- 1. Application to Florida Junior College at Jacksonville.
- 2. Application to the Dental Hygiene Program.
- 3. High School transcript or copy of General Education Development (GED) test scores.
- 4. College transcript (if any college work has been attempted).
- 5. Official copy of Dental Hygiene Aptitude Test Scores.
- 6. Official copy of California Achievement Test (CAT).

Students admitted to the program must present a report of a complete physical examination made not more than 30 days prior to the enrollment for the first dental hygiene course.

Information may be obtained by contacting the Director of Dental Programs, North Campus, Florida Junior College at Jacksonville concerning program requirements and admission procedures.

Any students who have academic deficiencies as determined by the program director will be scheduled into additional appropriate courses for correction of those deficiencies. This assessment may occur prior to or during the program.

## **Emergency Medical Technology**

The program is a combination of general education, technical and clinical skills. This process offers a student the opportunity to learn the technical skills of crisis emergency care necessary to support life.

Any students who have academic deficiencies, determined by the program director, will be scheduled into additional appropriate courses for correction of these deficiencies. This assessment may occur either prior to or during the program.

During the clinical phase the student will observe a special calendar, which is not identical with the college's published calendar. The schedule is designed to meet minimum requirements promulgated by the Health Program Office-Emergency Medical Services Section, of the State of Florida.

Emergency medical technology courses must be taken in sequence with the designated prerequisite and corequisite courses. A grade of 2.00 must be earned in each professional course, Human Anatomy & Physiology, Microbiology and Chemistry. A cumulative GPA of 2.00 must be achieved prior to scheduling EMT 2287 and must be maintained throughout the remainder of the program.

NOTE: It is recommended that students have a conference with the EMT counselor prior to applying to the Emergency Medical Technology Program.

# **Medical Laboratory Technology**

The goal of the program in Medical Laboratory Technology is to offer the student an opportunity to learn the technical skills of medical laboratory science. The curriculum includes academic, technical, and clinical courses.

Admission to the program for medical laboratory technicians is limited. Applicants must show evidence of good health and have an earned high school diploma or GED Certificate. Program admission procedures may be obtained from the Director of Medical Laboratory Technology, North Campus. Prior to registration for each term, all students must have academic advisement by the program director.

Students who have academic deficiencies and/or requirements as determined by the program director, will be placed in additional appropriate courses for the correction of these deficiencies and/or requirements. This assessment may occur either prior to or during the program.

Students must earn a grade of C or better in the medical laboratory courses and complete all campusbased courses with a grade point average of 2.00 or better before entering the clinical phase of their education. During the student's clinical phase, a special calendar which is not identical to the college's published calendar, will be observed. This will conform to the clinical facilities schedule and the requirements of the National Association for Accrediting Clinical Laboratory Science, AMA Council on Medical Education.

In order to be employed in a medical laboratory in Florida, program graduates must pass the Florida State Licensure Examination for Medical Technicians. Program graduates are eligible for the Florida State Licensure Examination for Medical Laboratory Technologists.

# Nursing

The program of study is a combination of General Education and Nursing Education. Nursing courses are based on the concept of the Wellness-Illness Continuum. It is this concept that the faculty accepts as the framework for unifying all experiences within the program. Graduates of the program are prepared to function as beginning Nurse Practitioners in giving direct care to patients. Upon completion of the program, graduates are awarded an Associate in Science Degree in Nursing and are eligible to write the State Board Test Pool Examination to qualify for licensure to practice as a Registered Nurse.

Enrollment in the Nursing Program is limited. Applicants are admitted into the program three times a year: Fall Term, Winter Term, Spring/Summer Term. A brochure outlining costs, admission requirements, cut-off dates, and procedures is available from the nursing counselor, North Campus, and from the Student Development offices at North, South, Kent, or the Downtown Campuses. Approximately three weeks prior to the beginning of each term, letters are sent to each applicant indicating admission, accepted for alternate, or not accepted. Both single and married men and women may be admitted to the program. There is no age limit.

<sup>\*\*</sup>Students who qualify may substitute CHM 1045C and CHM 1046C.

#### **Application Prerequisites:**

Applicants to the Nursing Program must:

- 1. Have an earned high school diploma or GED Certificate.
- 2. Be accepted for admission to Florida Junior College at Jacksonville, be currently enrolled at FJC, or a former student of FJC.
- 3. Have completed a course in chemistry with a minimum grade of C, in high school or college.
- 4. Have six college credits in anatomy and physiology with a minimum grade of C earned.

NOTE: It is recommended that students have a conference with the nursing counselor prior to applying to the Nursing Program.

# Radiologic Technology

The purpose of this program is to offer advanced training and supporting science and general education to persons who are currently Registered Radiologic Technologists. It is an advanced Associate in Science degree program in Radiologic Technology. Only persons currently on the American Registry of Radiologic Technologists are eligible to enroll in this program. Upon enrollment and presentation of current ARRT Registry, degree-seeking students will be granted 30 semester hours toward the total of 63 semester hours required for the degree.

Specific information on program admission requirements and costs can be obtained from the Coordinator for Radiologic Technology, North Campus.

# Respiratory Therapy

This program is designed to help the student to learn the skills of a respiratory therapist. Graduates of this program are eligible to take the national examination, given by the National Board for Respiratory Therapy, to become Registered Therapists.

Admission to this two-year AS degree program is limited. Applicants must have an earned high school diploma or GED Certificate. A background in science and mathematics is strongly recommended.

The Respiratory Therapy Program admits students one time per year in the Fall Term; specific information on program requirements, admission procedures and dates, and costs may be obtained by contacting the coordinator for Respiratory Therapy, North Campus.

The curriculum includes technical courses, clinical practicum, and academic courses. Graduation from the program is dependent upon receiving a grade of C or above in all required science, mathematics, and respiratory therapy courses.

# HOME ECONOMICS EDUCATION

#### Child Care Services

Students completing the program will have had the opportunity to observe and participate in the Child Care Laboratory at the North Campus. Graduates of the program will be able to serve the community through acquired skills which will qualify them to work with young children.

Child care students are expected to read at 10.5 grade level as measured by a standard reading test approved by the program director. Any students who have academic deficiencies, as determined by the program director, will be scheduled into additional appropriate courses for correction of these deficiencies. This assessment may occur either prior to or during the program.

### Food Service Technology

This competency-based program is designed to prepare students to seek employment in the food service industry at the mid-management level in restaurants, cafeterias, extended care facilities, schools, hospitals, and fast food service operations. Competencies needed may be acquired through a combination of theory, laboratory and community experiences. Students may acquire credits for demonstrated specified competencies acquired through previous education and/or experience.

credit hours 45

The Dietetic Technician Option prepares students to function at the management level of dietetic care under the supervision of the Registered Dietitian or under general supervision in consultation with the dietitian. Typical duties include supervision of employees, menu planning, patient interviewing, diet instruction for routine modification, employee training, food purchasing, and supervision of food production. The dietetic technician is an integral member of the health care team in an occupation offering both personal and financial rewards. Upon completion of the Dietetic Technician Option, the student may apply for membership in the American Dietetic Association. Graduates of an ADA approved program meet licensure requirements under Public Law 10D-29.15.

The program director may require additional courses or make substitutions as required to meet the needs of students.

# Interior Design Technology

The program includes a combination of theory and laboratory and community experiences for the development of competencies in all phases of interior design technology. Concepts of the program include characteristics and performance of textiles; selection, arrangement and maintenance of furniture and accessories; art principles; decorating and design skills; materials and sources; exhibition design; architectural design, history of interiors and business aspects. Management, safety, free enterprise, consumer and economic education are also included. Application of communication, computation and human relations skills are an integral part of the instructional program. Instruction related to rules, regulations and legislation will be included.

# PUBLIC SERVICE EDUCATION

#### Criminal Justice Education – Corrections

This program is under the guidance of an advisory committee composed of community leaders and administrators from local criminal justice agencies. This assures that the student will receive modern, up-to-date instruction that is relevant to current practices in the field.

Law enforcement courses and general education subjects are offered on a day and evening interchangeable basis.

The program director may require and/or approve additional courses for program completion or may approve the substitution of courses based on student needs.

#### Criminal Justice Education - Law Enforcement

This program is under the guidance of an advisory committee composed of community leaders and administrators from local criminal justice agencies. This assures that the student will receive modern, up-to-date instruction that is relevant to current practices in the field.

Law enforcement courses and general education subjects are offered on a day and evening interchangeable basis.

The program director may require additional courses or make substitutions required to meet the needs of students.

A student may apply for and obtain a Certificate in Criminal Justice-Law Enforcement by completing the 12 law enforcement courses specified for that purpose listed hereafter under Professional and Other Required Courses.

# Fire Science and Prevention

The Fire Science and Prevention Program is designed to provide training for persons who desire to enter the fire service; to seek employment in industrial fire protection, with insurance companies or with fire protection equipment companies; and to upgrade the professional status and intellectual competence of those currently employed in the fire service.

The program is under the guidance of an advisory committee composed of community leaders and administrators from local fire departments. This assures that the student will receive modern, up-to-date instruction that is relevant to current practices in the field.

Fire science and general education subjects are offered on a primary night and alternate night or day

The program director may require additional courses or make substitutions required to meet the needs of students.

<sup>\*</sup>Refer AS degree General Education Requirements.

<sup>\*\*</sup>For the Associate in Science degree only, EMT 1101 — Basic Emergency Medical Technology may be used to satisfy six hours of the requirements for 33 hours of FFP prefixed professional courses. If this option is selected, FFP 1000 must be taken and FFP 2660 may not also be taken for credit.

<sup>\*\*\*</sup>Students not having sufficient mathematics preparation may be required to take MAT 1024 and MAT 1033 before taking MAC 1104. In such cases total credit hours required for graduation will be increased.

## Legal Assistant

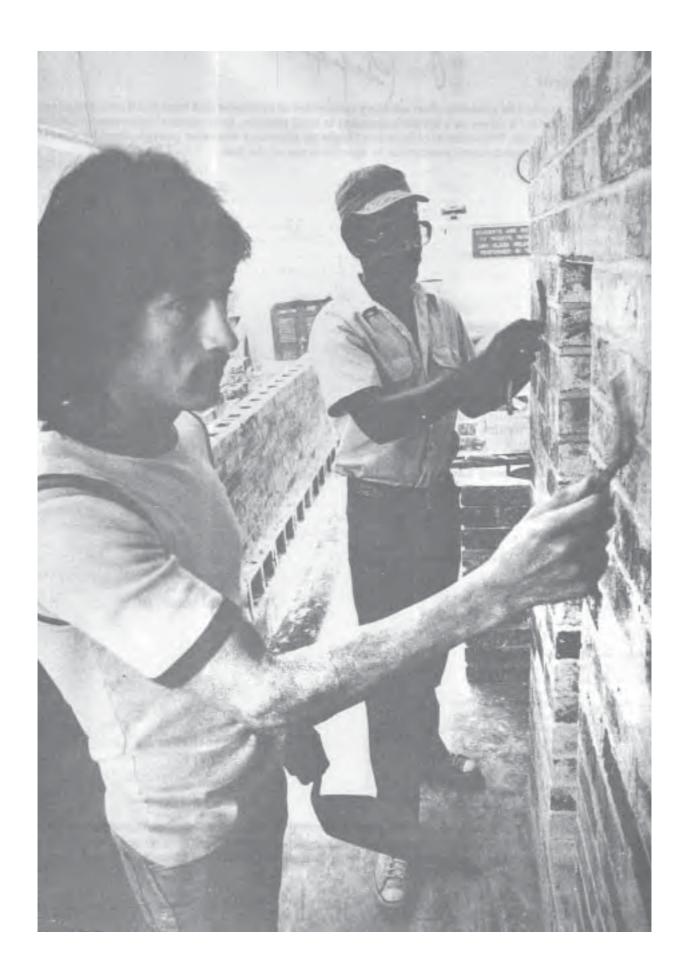

This program, under the guidance of an advisory committee of attorneys and legal assistants, is designed to prepare a student for a career as a lawyer's assistant in legal practice, or in various businesses, industries, or governmental agencies. Professional courses are taught by attorneys whenever possible, thereby assuring students of meaningful and direct instruction in specific areas of the law.

Courses other than those listed previously may be selected upon approval of the program director.

Students wishing to enter the program without prior experience in the legal field must successfully complete the General Education Requirements or have permission of the director before enrolling in any professional course in the Legal Assistant Program.

# The Associate in Applied Science Degree and Technical Certificate

The objective of the Associate in Applied Science degree is to provide a more comprehensive and higher level of training than can be offered by the non-college credit occupational preparatory programs of study. Education here is designed to meet the training needs of the individual as indicated by industry needs. Professionals from industry are very instrumental in assessing community needs and serve on special advisory committees to assist FJC with meeting these needs.

The technical competencies acquired by the individual will enhance the ability of the graduate to comprehend and stay current with rapid change in technology and employment requirements of a chosen occupation. A certificate option is also available to provide the basic professional courses of the occupation.

Associate in Applied Science degree education requirements and graduation requirements are the same as those for the Associate in Science degree.

Before a student may graduate, the student must have fulfilled all financial obligations to the College.

### Construction Technology

\*Refer to AS degree General Education Requirements.

The objective of this program is to prepare the student for a career in the fields related to Construction Technology.

The two-year program in construction technology is designed to provide the student with the knowledge/skill requirements necessary for building construction trades by providing the theory, basic skills, safety, and first aid training common to all building trades. The specialty courses provide the knowledge/skills directed to specific construction technologies.

Students enrolled in this program of study are required to take the General Education Requirements and Core Courses listed.

# Metal Trades Technology

The objective of this program is to prepare the student for a career in the fields related to Metal Trades Technology.

The two-year program in metal trades technology is designed to provide the student with the knowledge/skill requirements necessary for metals trades by providing the theory, basic skills, safety, and first aid training common to all metal trades. The specialty courses provide the knowledge/skills directed to specific metal trades technologies.

Students enrolled in this program of study are required to take the General Education Requirements and Core Courses listed.

# Road Vehicle and Small Gas Engine Technology

The objective of this program is to prepare the student for a career in the road vehicle and small engine

The two-year program in road vehicle and small gas engine technology is designed to provide core courses that will meet the knowledge/skill requirements necessary for all vehicle specialized areas by providing theory, basic skills, safety and first aid training. Specialty courses provide knowledge and work tasks directed to a specific Occupational/Technical area.

Theory courses and hands-on laboratory experience will be provided to train students to keep pace with and handle competently the ever more sophisticated and complex machines, instruments, and technical literature which are continually being developed by the industries.

Students enrolled in this program of study are required to take the General Education Requirements and Core Courses listed.
